

St John's Square and Main Street Improvements

CURRENT AND UPCOMING IMPROVEMENTS

- Intersection Improvements at Main St and Grand St / Rapallo Ave continue over the next two weeks. Work includes the addition of sidewalk bump-outs at the NW and SE corners of the intersection and ADA ramp updates in the other corners. The installation of the new signalization poles at this intersection is also scheduled to occur in the coming weeks.
- Similar improvements will be occurring at Main St and Hartford Ave as well as Main St and Washington St — The schedule of these activities will be updated as it becomes available.

Bump outs improve safety because they increase visibility, reduce speed of turning vehicles, encourage pedestrians to cross at designated locations, shorten the crossing distance, and prevent vehicles from parking at corners. Source: FHWA
